Robert Koda Takumi K-10

\$31,000

www.robert-koda.com

The K-10 is at the upper end of the price spectrum for a linestage, especially one with only four inputs and no remote. Yet it is built with the bespoke attention paid to a six figure Swiss timepiece or Rolls Royce. Every component painstakingly hand matched and assembled in a vault-like enclosure, sonically and mechanically.

Best of all, the K-10 delivers the goods, producing music in an uncolored nature that will puzzle even the most seasoned audiophile as to circuit design and type of active devices employed. It is pure music.
